

CHARTIS

Establish Cybersecurity & Risk Management Confidence

With the heightened focus on digital transformation and data sharing, the healthcare industry is a prime target for cyber-attacks.

Healthcare providers have never been more vulnerable. The data they store is highly valuable, and its loss can be life-threatening to those they serve. With the exponential growth in cyber-attacks, it is more important than ever for organizations to ensure the strength of their security posture and resiliency.

People are still considered an organization's biggest risk, so expecting security technologies to significantly reduce attacks will leave your organization exposed. Taking a holistic approach to improve your cyber defenses through people, process, and technology will garner longer-term, effective results. Focused preparedness for when an incident occurs will reduce overall patient impact and costs.

We can help.

We can help you align your health system imperatives as a strategic enabler, while identifying and lowering your cybersecurity risk profile. We provide a wide variety of cybersecurity-related services, from **cybersecurity strategy and assessment**, **interim leadership**, and **consulting services** that support building and testing your cybersecurity program.

Partnering with you on cybersecurity improvement, we provide the following:

STRATEGY

- Cybersecurity strategy/roadmap development and governance
- Risk & security program assessment, planning and development
- Compliance program assessment and remediation
- Crisis communications planning and leadership training
- Business Continuity & Disaster Recovery

INTERIM LEADERSHIP

- Interim security, risk management, privacy leadership position
- Security program leadership and advisory subscription (vCISO)

ASSESSMENTS

- Security risk analysis and response
- NIST cybersecurity framework
- HITRUST certification readiness
- HIPAA security
- Medical device security
- Application assessment
- Vendor risk management
- Cyber risk due-diligence

CONSULTING SERVICES

- Assistance with remediation of identified gaps
- Business impact analysis
- Technical project management
- Audit preparedness
- Incident response testing and communications support

The Results You Can Expect to See

Our clients experience measurable results:

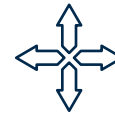

Streamlined processes that identify and reduce cyber risks

Evaluation findings linked to actionable recommendations

Close collaboration for planning and fixing remediation activities

Flexibility that can scale with growth and acquisition

Engagements that are on time and on budget

A Proven Partner You Can Trust

We Bring:

- Deep healthcare-specific cybersecurity experience
- Cybersecurity focus across the enterprise, not just IT
- Objective recommendations because we are not a reseller
- A holistic approach toward security maturity, not only compliance
- Dedication to ensuring cybersecurity is a strategic enabler, not just a cost center

Establish Cyber Confidence.

Improving your cyber defenses and strengthening your cyber resiliency will reduce risk and foster optimal confidence from patients, providers, employees, and the communities you serve.
